FORM Fashion: Making Math Wearable

Tue, 03/12/2013 - 22:08

Developed by architect Anne Trelease, the Cartesian scarf has an innovative design that fits the wearer's body without adding bulk. Super chic, it can be worn multiple ways and even double as a head wrap. Image via Kickstarter/Cartesian. For architect [Anne Trelease](#), designing apparel and designing buildings are not so far apart. "It's very similar to architecture," she points out, "in that even the most mundane decisions involve time-consuming research and painstaking mock-ups, drawn, built or otherwise. And you either have to finish it or shelve it." She should know. Her newest project is the [Cartesian Scarf](#), an innovative take on knitted neckwear that's design to bend and twist and to conform to a wearer's body without being bulky.
